

DTCC

DTCC Company Brief

COMPANY OVERVIEW

The Depository Trust & Clearing Corporation (DTCC) is a leading post-trade financial services company established in 1999. DTCC provides industry-leading solutions that drive efficiency and quality in the securities and financial markets through innovative clearing, settlement, and information services. With a global presence, DTCC processes over \$2.25 quadrillion in securities transactions annually and serves as a central clearinghouse for global financial markets.

PRODUCTS/SERVICES

DTCC offers a wide range of services focused on post-trade processing for the financial industry, including:

- **Clearing and Settlement Services:** Essential infrastructure for clearing, settlement, and custody of securities.
- **Institutional Trade Processing:** Solutions for trade matching, confirmation, and enrichment of institutional trades.
- **Data Services:** Analytical and market data solutions offering insight into market trends and activity.
- **Global Trade Repository Services:** Comprehensive reporting services for complex derivatives markets, enhancing transparency and risk assessment.
- **Derivatives Services:** Efficient processing and clearing of over-the-counter (OTC) derivatives.

CULTURE & VALUES

DTCC prides itself on a culture of innovation, integrity, and inclusivity. The company fosters a community-oriented environment that emphasizes:

- **Collaboration:** Working dynamically across teams to develop and deliver cutting-edge technology solutions.
- **Innovation:** Being at the forefront of technological advancements within the financial markets.
- **Diversity & Inclusion:** Promoting a diverse workplace that reflects the global markets it serves.
- **Professional Development:** Committing to the growth of its employees, offering ongoing learning and career development opportunities.

RECENT NEWS/TRENDS

- **Focus on Cloud Strategies:** Emphasizing cloud-native architectures and multi-cloud strategies to enhance operational efficiency and resilience in the digital landscape.
- **Expansion in Web3 and Blockchain Technologies:** Active engagement in integrating decentralized technologies to modernize traditional financial services infrastructure.
- **Regulatory Compliance Innovations:** Implementing solutions to streamline regulatory compliance processes, focusing on enhancing transparency and data governance.

KEY TALKING POINTS FOR THE INTERVIEW

- **Impactful Role:** Discuss how your expertise in DevOps and cloud engineering can support DTCC's commitment to innovation and secure technology deployment, particularly in evolving areas like Web3 and blockchain.
- **Collaboration and Leadership:** Highlight your experience in leading cross-functional teams and your ability to foster collaboration with different stakeholders, such as application teams and risk management.
- **Commitment to Security and Compliance:** Showcase your experience in embedding security automation and governance within the software development lifecycle, contributing to DTCC's robust cloud infrastructure.
- **Infrastructure-as-Code and Cloud-Native Patterns:** Demonstrate your expertise in these areas and how you can drive the adoption of these practices to accelerate and optimize DTCC's technology delivery.

By joining DTCC as a Principal DevOps Engineering Manager, you have the opportunity to lead and innovate in a critical organization shaping the future of global financial markets technology.
