Hiring Manager

Paradigm

Dear Hiring Manager,

I am thrilled to apply for the Principal AI Architect - Remote position at Paradigm, a company renowned for its commitment to cutting-edge technology solutions. With over 18 years of experience as a Principal Architect specializing in Cloud, DevOps, and Generative AI, I seamlessly transform ambitious technical goals into secure, scalable cloud-native platforms. My expertise in enterprise solution architecture perfectly aligns with Paradigm's mission to innovate and lead in AI-driven solutions.

At Microsoft, where I served as Principal Architect for the GenAI Enablement Practice, I led the creation of the "SRE Buddy," a flagship solution integrating ICM, Kusto, and Azure DevOps. This achievement, which streamlined incident management for site reliability engineering teams, demonstrates my ability to tackle complex challenges and achieve measurable productivity gains—skills that will be invaluable in successfully fulfilling the responsibilities of the role at Paradigm.

Additionally, my architectural leadership and delivery success at Microsoft Marketing Web underscore my proficiency in creating cost-efficient, high-availability solutions. By migrating over 40 Microsoft.com websites to AKS, I reduced infrastructure costs by 40% and ensured operational excellence. This experience speaks directly to the demands of Paradigm's need for efficient and robust AI infrastructures, enabling innovation without compromising on performance or security.

I am eager to bring my proven track record of transformative leadership and technical innovation to Paradigm. I look forward to discussing how my extensive background in AI and cloud-native solutions can drive success for your team. Thank you for considering my application; an interview opportunity would be greatly appreciated.

Sincerely,

Bibhu Mishra
