PROFESSIONAL SUMMARY

Accomplished DevOps & Cloud Architect with extensive expertise in designing and implementing enterprise-scale DevOps solutions. Known for optimizing cloud infrastructure, enhancing security, and streamlining software delivery using Azure DevOps, Kubernetes (AKS), and Terraform. Currently leading efforts in generative AI (GenAI) solutions. Ready to apply a robust combination of CI/CD automation, application security, and strategic enablement to drive the DevOps Architect role at Resolve Tech Solutions.

CORE COMPETENCIES

DevOps & CI/CD: Azure DevOps, Terraform, YAML Pipelines, Kubernetes, Git branching strategies

Cloud Technologies: Azure services, AKS, Docker, Helm

Security & Monitoring: SonarQube, CodeQL, Prometheus, Azure Monitor

Generative AI & Automation: LangChain, LangGraph, MLflow, intelligent tooling

PROFESSIONAL EXPERIENCE

Principal Architect, Automation | Microsoft (LTI Mindtree Ltd.) | Dallas, TX | Jun 2025 – Present

- Spearheaded the GenAI Enablement Practice, defining best practices and architectures for scalable AI adoption in DevOps and support environments.
 - Architected and developed GenAI tools like SRE Buddy, utilizing RAG and integrating with Azure DevOps for improved SRE operations.
 - Directed the implementation of CI/CD pipelines using Azure DevOps on Azure Kubernetes Service (AKS), enhancing operational efficiency and enabling real-time monitoring with Langfuse and Grafana.
 - Led data-driven initiatives with AICA for management-ready insights, enhancing user-bot interaction analysis and strategic decision-making.
-

EDUCATION

Bachelor of Technology in Computer Science | [University Name] | [Graduation Year]
